Subject: Chat with Mark Cohen
From: Mark Cohen <mark.simon.cohen@gmail.com>
To: barriticus@gmail.com

me: did you already have that party?
Mark: umm yeah
me: oops
me: anywho, I'm now dating an Asian
Mark: nice transition
me: well, the last one was one-quarter Indian
Mark: i mean from not coming to the party to your love life
Mark: well, ok, so you're dating asian
Mark: congratulations?
me: thanks, it's my first one
me: oh, also
me: new version of Dwarf Fortress is out
me: it's the game that's so incredibly nuanced that a guy was able to build a logic engine within the game
me: a programmable computer akin to those of early 20th century
me: fluid dynamics, the fucking circulatory system of the dwarf characters
me: millions of possible overall personalities
Mark: it just keeps getting more intricate?
me: yeah, this is the first update in two years
me: it's incredible
me: if you decide to give it a shot, let me know
me: I'll set you up with best version, including grahpcis pack
Mark: hmm, probably not
Mark: but i'll let you know if i feel the need for insanely involved simulations games
me: do that
